Ultra-Lite Travel Trailers (with weights starting under 2,500 pounds!)

SL150VRK ▲ Latte décor

The Sonic Lite maximizes interior space with innovative features. This unique dinette with fold down Murphy Bed (patent pending) serves a dual purpose, providing convenient dining during the day and comfortable sleeping at night.

**Sonic Lite is light on weight, large on living, and generous on versatility. It boasts the same strong construction techniques as its older brother, but offers a single axle frame and weights starting at 2,480 pounds for towing ease.**

Even the smallest units are loaded with handsome, convenient features and ample storage. Whichever model you choose, you'll enjoy a fully functional kitchen complete with the appliances you need to prepare family meals.

Sonic and Sonic Lite both offer one-piece seamless fiberglass roof construction.

Seamless roofing prevents potential leaks, as the water runs off the front and back with no extrusions or seams. Avoids leaks around the sidewall seams, windows, doors, compartments and corner seams. Reliable seamless construction equals long-term investment.

# SONIC

BY VENTURE RV

Families on the go demand greater, more efficient towability. Sonic delivers with its line of ultra-lightweight, tandem-axle travel trailers designed for today's smaller tow vehicles, yet with amenities usually reserved for motorhomes. The one-piece seamless fiberglass roof system adds low-maintenance strength while slam latch baggage doors with magnetic catch provide access to the large pass-through storage. Inside, the luxury kitchen and living quarters offer all the comforts of home.

SN220VBH ▶ Latte décor

There's plenty of room to feed a crew in this expansive U-shaped dinette that converts into additional sleeping space at night.

All Sonics feature a square bumper for sewer hose storage, and can receive an optional bumper-mount grill.

# NXG FRAME

The Next Generation in RV Frame Technology

# SONIC

The NXG Frame is a superior quality, highly engineered frame that provides customers with a strong, lightweight, consistent foundation on which to build.

### ELIMINATES:

- Frame failures due to sub-standard steel
- Construction issues caused by improperly placed components
- Uneven main rails - varying camber
- Corrosion caused by incomplete coverage due to painting of stacked frame assemblies
- Paint failures caused by inadequately washed components

### KEY FEATURES:

- Constructed with HSLA - High Strength Low Alloy Prime Steel with specifically controlled properties
- Designed to accommodate both fifth wheel and travel trailer configurations
- CNC controlled rail fabrication allows placement of components precisely where the manufacturer wants them
- Manual welding is minimized. Common components are robotically welded for consistent quality
- All fastened components are joined with Huck® fasteners. Huck fasteners provide consistent clamp load
- CNC controlled camber
