

THE NXG FRAME IS A SUPERIOR QUALITY, HIGHLY ENGINEERED FRAME THAT PROVIDES CUSTOMERS WITH A STRONG, LIGHT WEIGHT, CONSISTENT FOUNDATION ON WHICH TO BUILD.

ELIMINATES:

- Frame failures due to sub-standard steel
- Construction issues caused by improperly placed components
- Uneven main rails - varying camber
- Corrosion caused by incomplete coverage due to painting of stacked frame assemblies
- Premature paint failures caused by inadequate paint process

KEY FEATURES:

- Constructed with HSLA - High Strength Low Alloy Prime Steel with specifically controlled properties.
- Designed to accommodate both fifth wheel and travel trailer configurations.
- CNC controlled rail fabrication allows placement of components precisely where the manufacturer wants them.
- Manual welding is minimized. Common components are robotically welded for consistent quality.
- All fastened components are joined with Huck[®] fasteners. Huck[®] fasteners provide consistent clamp load.
- CNC controlled camber.
