- ✓ Better fuel saving with 3040 lbs weight
- ✓ Spacious bathroom with a wardrobe and 34-inch shower

**Quick Specs**

- Sleeps: 2
- Number of Floorplans: 7
- Weight: 3040 pounds

**Our Review**

This is one of the best travel trailers in the market that weigh less than 4000 lbs. It has many impressive features that make it a favorite of most users. The best thing about it is the space and the feeling of openness. You do not feel cramped or suffocated in it both because of the clean layout and windows.

Moreover, it has pass-through storage on the sides, which helps you store all your luggage away from sight. There are flip-up solid steps in it as well, which you can use for easy mount on the travel trailer. This, along with the sturdy entrance frame, provides better support to the elderly when they are climbing up.

In addition to these, there is a luxury style bathroom furnished with a large wardrobe. There is a 34-inch shower in the bathroom as well, so if you want both comfort and practicality, you should choose this one.

### Conclusion

Keeping all the aspects in view, a 4000-pound travel trailer is the best option for you if you have moderate usage needs. So, go through our reviewed models and see which one works the best for you.

### People Also Ask

Well, travel trailers are quite common, but models under 4000 lbs are not that widely used. This is why people have many questions regarding these. So, we have answered the most commonly asked questions for you.

#### What is the Tongue Weight on a 4000 Pound Travel Trailer?

The tongue weight of 4000-pound travel trailer models is different as they have different manufacturers. But, on average, it is between 400 and 450 pounds for most travel trailers.

#### How Much Will a 4000 Lb Travel Trailer Weigh Loaded?

The weight of a trailer is the unloaded vehicle weight (UVW), plus the net carrying capacity (NCC), which combines to the total gross vehicle weight rating (GVWR).

WHAT'S THE MAXIMUM I CAN TOW?

**Gross Vehicle Weight (GVW)** + **Maximum Loaded Trailer Weight** = **Gross Combined Weight Rating (GCWR)**

*Truck + Passengers + Cargo* + *Loaded Trailer - to tow* = *Loaded Truck + Loaded Trailer*
